The tool makes it easy to discover which of your apps are not only using up your time, but also which apps you need to free up time for other tasks. Similar to the Android version, Digital Wellbeing For Windows Crack provides you with a smooth and modern interface that features ModernWpf and Live Chart. Features: Optimizes time usage across all devices The tool uses the Windows Event Log to automatically record all of the activity of your device, such as the programs you start and the time you spent on the device. The data is then transferred to the Microsoft Azure platform so that the developer can analyze it to determine how you are using your device. Daily app usage as pie and chart The application comes with a smooth and modern interface that features ModernWpf and Live Chart and is designed as a linear chart where you can immediately check out the usage for the last 7 days. The role of the tool is to provide insight on the applications most used so that you can figure out how to improve your productivity, for example. The information is displayed as a pie and a color chart along with a list of the most frequently used programs. As indicated in the GUI, right under the chart, the applications that are used under 5 minutes are not taken into account. According to the developer, the program is set to auto-refresh at various intervals, so you are likely to see your first data after the refreshed happens. While by default the app tracks all applications used, you can customize the tool to monitor only certain applications. To do so, you need to access the Settings and include it in the Excluded apps list by double clicking on it. Allows you to set a time limit per application usage It is worth mentioning that you can configure alerts that let you know when you reached a time limit using a certain app. You can add the aforementioned notifications from the

Settings by double clicking on the app name and setting the desired limit.
